ANNUAL CONFERENCE

MONTEREY PLAZA HOTEL

SEPTEMBER 30 - OCTOBER 2

You are invited to attend the NCPA Annual Conference

September 30 – October 2, 2015

Monterey Plaza Hotel

400 Cannery Row

Monterey, California

California's electric power infrastructure is on the cusp of a revolution. Innovations continue to drive down costs for cleaner resources. Energy efficiency and smart grid technologies present alternative solutions for meeting growing energy needs instead of building new power plants. Distributed resources — from electric vehicles to rooftop solar panels — are transforming customers from energy users into energy partners, with the potential to provide energy services back to the grid. Customer expectations are shifting as well as the intersection of information and energy technology facilitates advanced energy management of the home and office building, allowing customers far greater control of their energy usage and bills.

The 20th Century model of large, central-station power plants delivering a steadily increasing amount of electricity to customers through a one-directional transmission and distribution system is evolving into one that is far more variable and complex.

The 2015 Annual Conference will explore the primary policy and technological developments that are driving the 21st Century energy revolution. Join us as thought leaders at the state and federal level share their perspective on emerging clean energy policy developments that will further accelerate the demand for advanced technologies. In addition, executives from utilities and industry partners will outline strategies for utilizing the unique attributes of public power to shape the future of our industry.

ALL EVENTS BADGE (GOLF ADDITIONAL)

NCPA Members*	\$495
Spouse/Guest	\$150
Non-Members	\$695
Spouse/Guest	\$300
Golf	\$100
Welcome Reception Only	\$100
